OUR CUSTOMERS, OUR TRIBE

Your connection with your bike is truly special. It's what calls you back time after time to get out there and ride. To keep searching for that perfect line down the mountain or that truly complete ride. Nothing beats that feeling, and PRO is all about feeling.

We know how important that connection is. We know that 'one size fits all' doesn't work great for anyone, which is why we commit every ounce of effort to creating components that work with you, get you closer to your bike and allow you to feed that need. That need to ride, to get out onto your local roads, into the forests and over the mountains. To push yourself and your equipment as far as it can go, through that invisible barrier to go further than you thought possible.

As your needs continue to evolve PRO is with you on every pedal stroke, over every berm and every summit. With our MY20 range of gravel, road and MTB products, as well as our latest pumps, tools and accessories, PRO allows you to get closer to your ride than ever before.

Whether your search takes you into the Alps, across entire continents or simply into your local woods, PRO gives you all you need.

PRO. POWERS YOUR PERFORMANCE.

BRAND STATEMENT

We're here to put the right bits in the right hands. Our purpose is to design, prototype, test, modify, improve and fine-tune the elements on your bike that will enable you to achieve your goals.

The best products and services always evolve from a continuous cycle of ideas, input and feedback from riders, designers and engineers.

Based on this collective intelligence, we push our products to – and often beyond – their limits. So riders can do the same. On the world's most challenging and exciting roads, trails, mountains and tracks.

OUR VALUES

COLLABORATION

New ideas and products can only be created by effective collaboration.

RELIABLE

Every single product we create is tried and tested to the max. Reliability is the cornerstone of trust.

PROGRESSIVE

Always looking forward, eager to find innovative ways to create a better bike experience.

JOY

Never forgetting that the end result of what we do for our customers is always about creating joy.

EVERYTHING WE DO IS AIMED AT PROVIDING RIDERS A BETTER SPORTS BICYCLE EXPERIENCE.

WHAT

Every cyclist / rider can relate to the term 'better'. It taps into their mindset of continuous development, improvement and progress.

HOW

Our customers don't just buy a sports bicycle product for its list of features and technology. They're buying into the people that made that a reality.

WHY

We believe in good. We're here in helping you to get better. We committed in making you the best. PRO is all about improving people – powered performance.

OUR MANIFESTO

There's no roadmap or manual for success. You can only perform at the best of your ability if you don't get complacent. Keep pushing, Never settle.

We never know when to stop. But always know when to go. Our products all have a story. Crafted, engineered and manufactured based on deep insights into the wants and needs of different riders. A better sports bicycle experience.

We believe in good. We're passionate about helping you to get better. We're committed in making you the best. PRO is all about improving people-powered performance.

We know that everyone wants to be the best they can be. Every rider needs role models who inspire, teach and motivate. Whether you just started a few months ago, or have been around for years.

PRO blends passion with performance. We know that friendship and biking creates amazing memories.

Everyday, it's you and the tribe of riders that continue to push us forward. Push. Pedal. Passion. Riding is our life. And our life is all about riding with you – every pedal of the way.

PRO. POWERS YOUR PERFORMANCE.

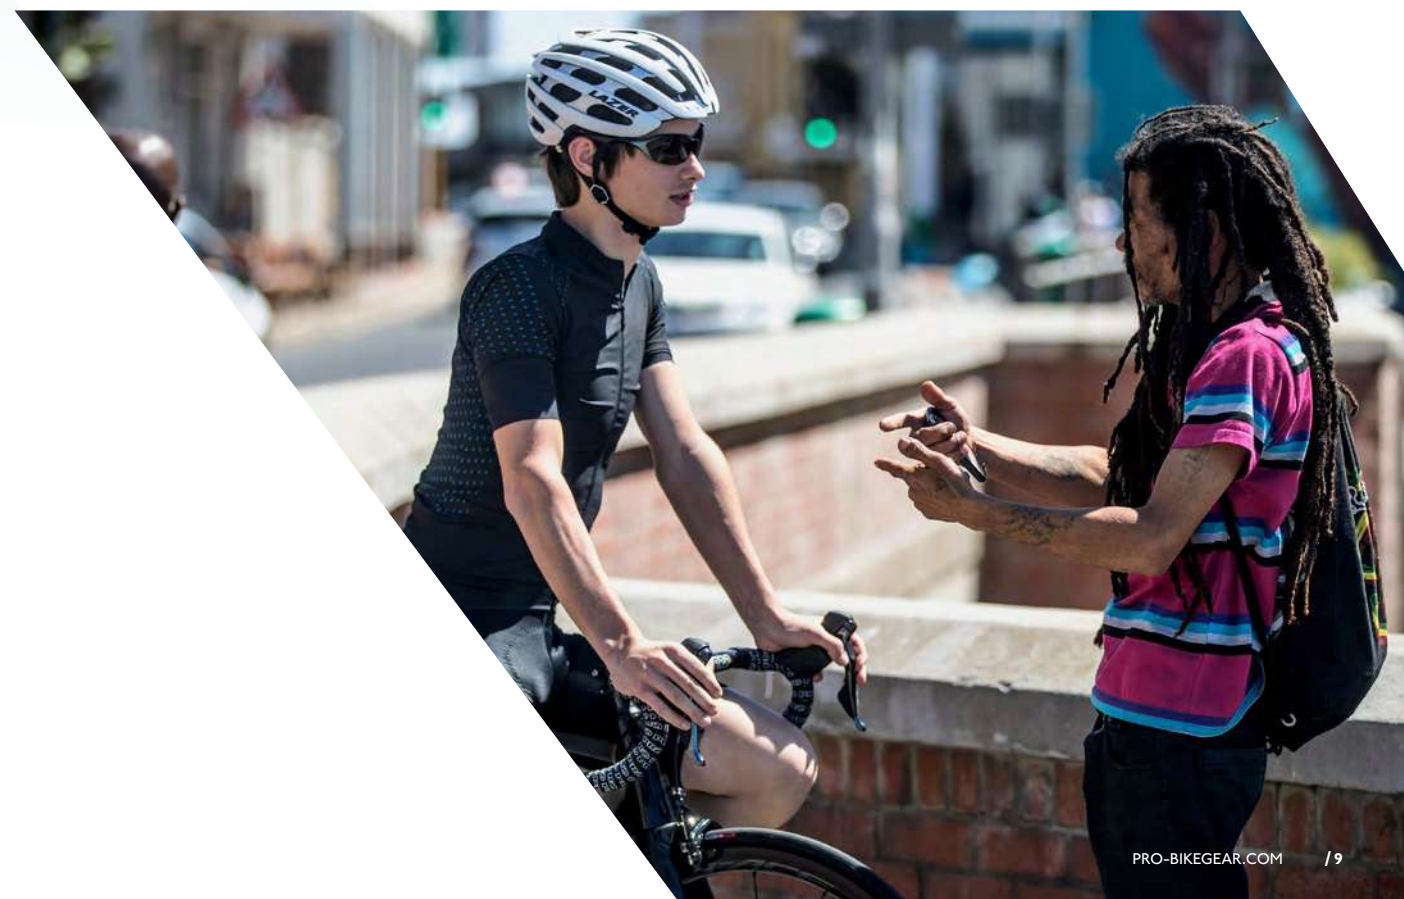

GOOD, BETTER, BEST

Riders across the globe have their own unique connection to their bikes, and the achievements that come with it. PRO knows that 'one size fits all' never works. Our products are created for different types of riders, with varying levels of:

- Stamina
- Endurance
- Technique
- Commitment
- Perseverance
- Knowledge
- Experience
- Skills
- Confidence

While there might be differences, there's one thing that binds them together: the need for a brand that is always there for them when it matters most. With products whose quality is never compromised.

Acknowledging these distinctions has inspired us to structure our product portfolio according to the 'Good, Better, Best' principle. Products in each level vary in terms of e.g. material, weight, shape. This enables us to highlight the differences between them, making our marketing and sales approach more effective.

ROAD COMPONENTS

When the road is calling you need equipment that can take you where you want to go, components that inspire confidence, allow you to be the best you can be. Whether that's first across the finish or just first to the café, our road range puts everything right where you need it.

Our handlebars and stems are developed to work seamlessly together, providing marginal gains for every rider, not just those in the professional peloton. PRO's line up includes alloy and carbon handlebars and stems, offering exceptional performance across all levels and budgets. The idea is that a great cockpit is a great cockpit, regardless of material choice.

The enduring popularity of carbon, the growth of electronic gearing and the demands of riders for aero gains continues to drive our development of road components. Our new Vibe carbon stem gives riders the ability to create a slick, full carbon cockpit, perfectly matching our Vibe or Vibe Aero handlebars, to create the fastest weapon on the road.

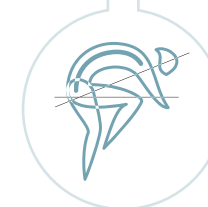

As our riders grow we continue to give them what they need. From the feel of the bike in their hands to the comfort of their saddle, PRO road components give them the tools to answer the call of the road every time.

FIND

Whatever the required component, we're here to help you find it. Our extensive knowledge and expertise will guide you through the different steps you'll take in creating the perfect fit. Taking into account both physical and riding style variables.

FIT

Every body is different. Our collaboration with **Bikefitting.com** allows us to put to use two decades of experience in the field of bike fitting. Using a range of different tools and analyses we're able to provide you with the precise measurement you need for every component. This will prevent injuries and increase riding comfort.

BUY

Our broad product range offers maximum flexibility of choice. We're so confident about the quality of our products that we're proud to offer you a lifetime warranty.*

* For handlebars/stems/seatposts and based on an expected lifetime of 10 years.

VIBE SUPERLIGHT

PRO VIBE \ AERO SUPERLIGHT

THE LIGHTEST FULLY INTEGRATED AERO HANDLEBAR

- SUPERLIGHT CARBON FIBER LAYUP
- AERODYNAMIC DESIGN
- PERFECT MATCH WITH DI2
- CONSTRUCTED WITH INNEGRA

PART NO.	ITEM DESCRPT.	ADD. INFO.
PRHA0445	VIBE AERO SUPERLIGHT HB	COMP38CM/31.8MM
PRHA0446	VIBE AERO SUPERLIGHT HB	COMP40CM/31.8MM

SADDLES

From the front of the pack to the back, PRO's saddle shapes offer a complete range for all riders and all levels. From first-timers to the pro ranks, comfort to performance, on road to extreme off-road, PRO saddles cater for the demands of riders around the globe.

For MY20 we've developed the Stealth Superlight saddle, constructed from a single piece of carbon with superlight EVA padding, designed for supreme performance with a 15% weight saving, compared to the already light Stealth saddle. Ridden by riders of Team Sunweb in the 2019 Tour de France, this 'hors catégorie' saddle is the absolute embodiment of PRO engineering, the archetype of awesome.

We've followed this ethos in designing our latest off-road saddles too. The Stealth Offroad gives our riders comfort, compliance and support, perfect for aggressive riding positions in for example XC and gravel disciplines. The profile of the saddle maximizes maneuverability and specific cutouts in the base and deck provide pressure relief in an incredibly lightweight and durable design. In short: evolved ergonomics.

Whether our riders are on road or off, racing or cruising, slaying the trail or bikepacking the wilderness, our saddles are designed to provide comfort and performance all day long.

OUR SADDLE SHAPES

- STEALTH: SHORT, FOR AN AGGRESSIVE RIDING POSITION
- GRIFFON: CURVED, BEST FOR LOW BODY FLEXIBILITY
- TURNIX: SEMI CURVED, THE IDEAL ALL-ROUNDER
- FALCON: FLAT, FOR FLEXIBLE RIDERS
- VOLTURE: SPECIFICALLY DESIGNED FOR E-MTB

TEST YOURSELF

Whatever the size or position of your sit bones, your body flexibility or the way you straddle the saddle, we're here to make sure that your body performs to its full potential. This isn't your average saddle, it's a PRO saddle.

Our state-of-the-art online PRO saddle selector will help you find the perfect saddle in just a few easy steps.

But we all want to try before we buy, right? You can head down to a local dealer and take a test ride on one of our test saddles. Don't settle for anything less than perfect; if it isn't right then try another. That way, you're sure to find the perfect saddle eventually.

GRAVEL

Remember when you were a kid? When you just went for a ride, went where the path took you and didn't worry about where you might end up? When every ride was an adventure, even when it was just to the local park? That's what gravel riding is all about – just feeding that need to explore, to expand your horizons and find out what's beyond that hill.

Gravel riding is about more than what's beneath your wheels. It's about this feeling of freedom – the freedom to explore, to answer the question 'where does this path go?', allowing you to get away from busy roads and to discover just how far your bike can take you.

Riding gravel also improves your bike-handling skills. Slaying a loose, rocky descent or hopping over roots and rocks means you'll be even more confident once you return to the smooth tarmac.

Gravel riding is here to stay and so are the latest additions to the PRO DISCOVER range. The lightweight and robust PRO DISCOVER carbon handlebar is compatible with Shimano Di2 and has a mid section optimised for Shimano GRX, the ergonomically designed top section, 20-degree flare and a 5-degree backsweep providing supreme control. The sturdy PRO DISCOVER stem, available in multiple lengths, complete the gravel cockpit for adventurers who like to ride lighter and go further. Together the DISCOVER Stem and Handlebar are a force to be reckoned with.

Providing the answer when gravel gets technical, the PRO DISCOVER 70 DSP dropper seatpost offers up to 70mm of height-difference and can be operated by the remote on our drop handlebar. Compatible with Shimano GRX and internal cable routing, and securely held by a single bolt clamp, it gives you ultimate control at the flick of a switch.

The new PRO DISCOVER seatpost smooths out the roughest of rides. Made from Dyneema®, the world's strongest carbon fibre, it delivers a smooth ride, every ride. This material allows the seatpost to be more compliant and vibration damping for a smooth ride, every time.

Accessories like matching bar tape and a full line of bags means you're prepared for every adventure, no matter where it takes you. The waterproof PRO DISCOVER frame and saddle bags deliver optimal weight distribution and easy, secure fixation while the food pouch allows easy, single-handed access to snacks and drinks. Whether it's a weekend epic or a trip to the local beach, PRO has all you need to keep on exploring.

MTB COMPONENTS

MTB has grown up. Thirty plus years of development, spurred on by that original backyard spirit born at Repack, has created a demand for components specific to rider-need. No longer are MTB'ers willing to compromise.

XC riders want rigid, lightweight components, ones that provide sharp handling when the hammer goes down, capable of turning every ounce of effort into a winning surge. Trail and enduro riders call for components that are tough and durable, able to improve the bike's stability no matter how gnarly things get. You can't use the same parts for both – not if you want to be the best.

Riding is getting more radical all the time and PRO continues to meet rider expectations, and then go a little further. We continue to develop different products that can take it all on, capable of handling the extreme courses and trails that our riders are exploring more and more.

Our oversized Tharsis 3Five range continues to provide for the ever more extreme needs of enduro riders with new stems and handlebars and oversized 35mm diameter clamp areas. With two new handlebars, in both carbon and alloy, PRO riders have the ultimate in lightweight control and durability within their grasp. And held in place with our Tharsis 3Five stems, we prove once and for all that bigger really is better.

We've fully updated our strong and lightweight Koryak handlebar, for XC riders looking for ultimate control. Our Koryak Di2 handlebars are tested and compatible with e-mountainbikes. This allows you to guide the cables for Shimano STEPS internally for better protection and a cleaner look.

Our MY20 MTB product range has grown along with riders and riding styles. They expect the best, and that is exactly is what we deliver, every single time.

DROPPER POSTS

Some products reflect their versatility in their name. Dropper post is one of those. Riding with a dropper post can revolutionise your ride by making descents more stable. They lower your seat with the touch of a button, letting you “drop” your centre of gravity on the fly. This is when you’ll instantly experience the benefits of riding with a dropper post. The wants and needs of the riders are at the heart of our product development process. Our newly updated, wide range of droppers reflects our ambition to cover everything from XC, gravel to enduro riders. As usual, we have all bases covered.

Our Koryak dropper posts have external and internal cable routing in different lengths, and ergonomic levers for fast actuation. Each variant gives you more freedom to move during technically challenging descents.

PRO DROPPER POST STORY:

Smooth, reliable and durable.

PRO dropper posts enable riders to have a better bike experience through their unlimited adjustment capabilities. All versions deliver smooth travel and come with a cable-set allowing for adjustment at the dropper post lever. Easy to use and reliable, created to make sure you maintain cornering control and stability, particularly on descents.

FIND

Find the right dropper post that fits with your riding style easily with the new online PRO DSP SELECTOR, available on PRO’s website:
<https://www.pro-bikegear.com/global/en-gb/dropper-seatpost-selector>

MEASURE

As part of the online selector tool, we ask you to check three key measurements on your bike that will help us find the perfect dropper post:

1. Seat tube diameter
2. Distance between seat post clamp and the saddle rails
3. Maximum depth of the seat tube

BUY

Purchase the right dropper posts and experience how riding with a dropper post enables you to nail the trail, every time.

KORYAK

DROPPER POSTS

PRO KORYAK \ DROPPER POST INTERNAL 170

FOR THE BEST OFFROAD MANEUVERABILITY AND CONTROL

- COMES WITH NEW I-BY LEVER
- CABLE ADJUSTMENT AT LEVER-SIDE

MISSILE EVO

PRO MISSILE EVO \ CARBON AEROBAR

- FULL UD CARBON AERODYNAMIC DESIGN THAT MEETS UCI REQUIREMENTS
- WIDE ADJUSTABILITY OF ARMPADS AND EXTENSIONS FOR OPTIMAL ERGONOMIC AND AERODYNAMIC POSITION
- INTEGRATED BRAKE- AND SHIFT- CABLE ROUTING (ALSO FOR SHIMANO Di2)
- IDEALLY USED I.C.W. THE MISSILE EVO STEM FOR OPTIMAL AERODYNAMICS AND OPTICS
- SIZE: 400MM
- DIAMETER: 31.8MM

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0042	MISSILE EVO CARBON AEROBAR	BLACK J-BEND EXT. LARGE ARM.

PRO MISSILE EVO \ CARBON BASEBAR

- FULL UD CARBON AERODYNAMIC DESIGN THAT MEETS UCI REQUIREMENTS
- PERFECTLY TO MATCH WITH PRAB0017 MISSILE EVO CLIP-ON
- INCLUDING 4 SPACER ADAPTERS FOR "UNDER BAR" AND "TOP BAR" MOUNT
- INTEGRATED BRAKE- AND SHIFT-CABLE ROUTING (ALSO FOR SHIMANO Di2)
- IDEALLY USED I.C.W. THE MISSILE EVO STEM FOR OPTIMAL AERODYNAMICS AND OPTICS
- SIZE: 400MM

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0043	MISSILE EVO BASEBAR	BLACK BASEBAR ONLY

PRO MISSILE EVO \ CARBON CLIP-ON

- FOR "UNDER BAR" AND "TOP BAR" MOUNT
- WIDE ADJUSTABILITY OF ARMPADS AND EXTENSIONS FOR OPTIMAL ERGONOMIC AND AERODYNAMIC POSITIONS
- WIDE AND 1 CM THICK MICROFIBER ARM PADS
- DIAMETER: 31.8MM

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0045	MISSILE EVO CLIP-ON	BLACK SKI-BEND EXT. WIDE ARM.
PRAB0046	MISSILE EVO SKI-BEND	BLACK SKI-BEND

PRO MISSILE EVO \ CARBON STEM

- FULL UD CARBON AERODYNAMIC DESIGN
- INTEGRATED (SHIMANO DURA-ACE Di2) SHIFT CABLE ROUTING
- DEVELOPED FOR USE WITH THE MISSILE EVO AEROBAR FOR OPTIMAL AERODYNAMICS AND OPTICS

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRSS0426	MISSILE EVO CARBON STEM	BLACK UD CARBON 85MM / 31.8MM

PRO MISSILE EVO \ SPACER SET

- SPACER SET INCLUDING ALL THE STANDARD SPACERS THAT ARE IN THE MISSILE AEROBAR
- INCLUDING VARIOUS BOLT LENGTHS
- ORIGINAL SPARE PART

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0023	MISSILE EVO SPACER SET	STANDARD SPACER SET

PRO MISSILE EVO \ ARMREST XL \ LARGE

- MICROFIBER COVERED FOAM ARMPADS, 1 CM THICK
- VELCRO MOUNT AND 3M ADHESIVE UNDER VELCRO
- DEBOSSED PRO LOGO

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0048	MISSILE EVO ARMREST LARGE	BLACK L
PRAB0049	MISSILE EVO ARMREST XL LARGE	BLACK XL WIDE

PRO MISSILE EVO \ BRIDGE

- RISER SET INCLUDING 10 X 1 CM SPACERS AND BRIDGES FOR STABILITY
- INCLUDING VARIOUS BOLT LENGTHS
- ALUMINIUM AERODYNAMIC CONSTRUCTION THAT MEETS UCI REQUIREMENTS
- FOR WIDE OR NARROW SETUP SPECIFIC ITEM AVAILABLE

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0018	MISSILE EVO BRIDGE	RISER KIT NARROW SET-UP
PRAB0019	MISSILE EVO BRIDGE	RISER KIT WIDE SET-UP

PRO MISSILE EVO \ CLIP-ON BRACKETS

- AERO BRACKETS FOR MISSILE EVO COMPONENTS TO MOUNT ON 31.8MM
- FOR UNDER BAR AND TOP BAR MOUNT
- HEADLOCK CONSTRUCTION
- INCLUDING STAINLESS STEEL BOLTS

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0028	MISSILE EVO CLIP-ON BRACKETS	BRACKETS ONLY

PRO MISSILE EVO \ ARMPADS XL

- MICROFIBER COVEREDGEL ARMPADS, 1 CM THICK
- VELCRO MOUNT AND 3M ADHESIVE UNDER VELCRO
- DEBOSSSED PRO LOGO

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0030	MISSILE EVO ARMPADS	PADS FOR XL WIDE ARMRESTS

PRO MISSILE EVO \ ARMPADS L

- LARGE UD CARBON MULTI POSITION ARMREST
- INCLUDING MICROFI BER COVEREDGEL ARMPADS, 1 CM THICK
- INNER AND OUTER MOUNT OPTION
- 20MM SIDE SUPPORT

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0036	MISSILE EVO ARMPADS	PADS FOR LARGE ARMRESTS

PRO MISSILE EVO \ CARBON J-BEND

- UD CARBON OVAL SHAPED AERODYNAMIC AEROBAR EXTENSIONS
- FOR STRETCHED WRIST, LOW FRONTAL AREA ARM POSITION
- 10 POSITION HOLES, 5° INWARD AND 12° UPWARD TIP
- ROUND 19,4MM INNER DIAMETER FOR Di2 OR OTHER SHIFTING MECHANISM

PART NO.	ITEM DESCRIPT.	ADD. INFO.
PRAB0047	MISSILE EVO J-BEND	BLACK J-BEND

PRO MISSILE \ BASEBAR

- AEROFOIL TOP SECTION
- 10° STILTED UP BAR ENDS
- WITHIN 3;1 UCI REGULATION
- INTERNAL CABLE ROUTING

TOOLS

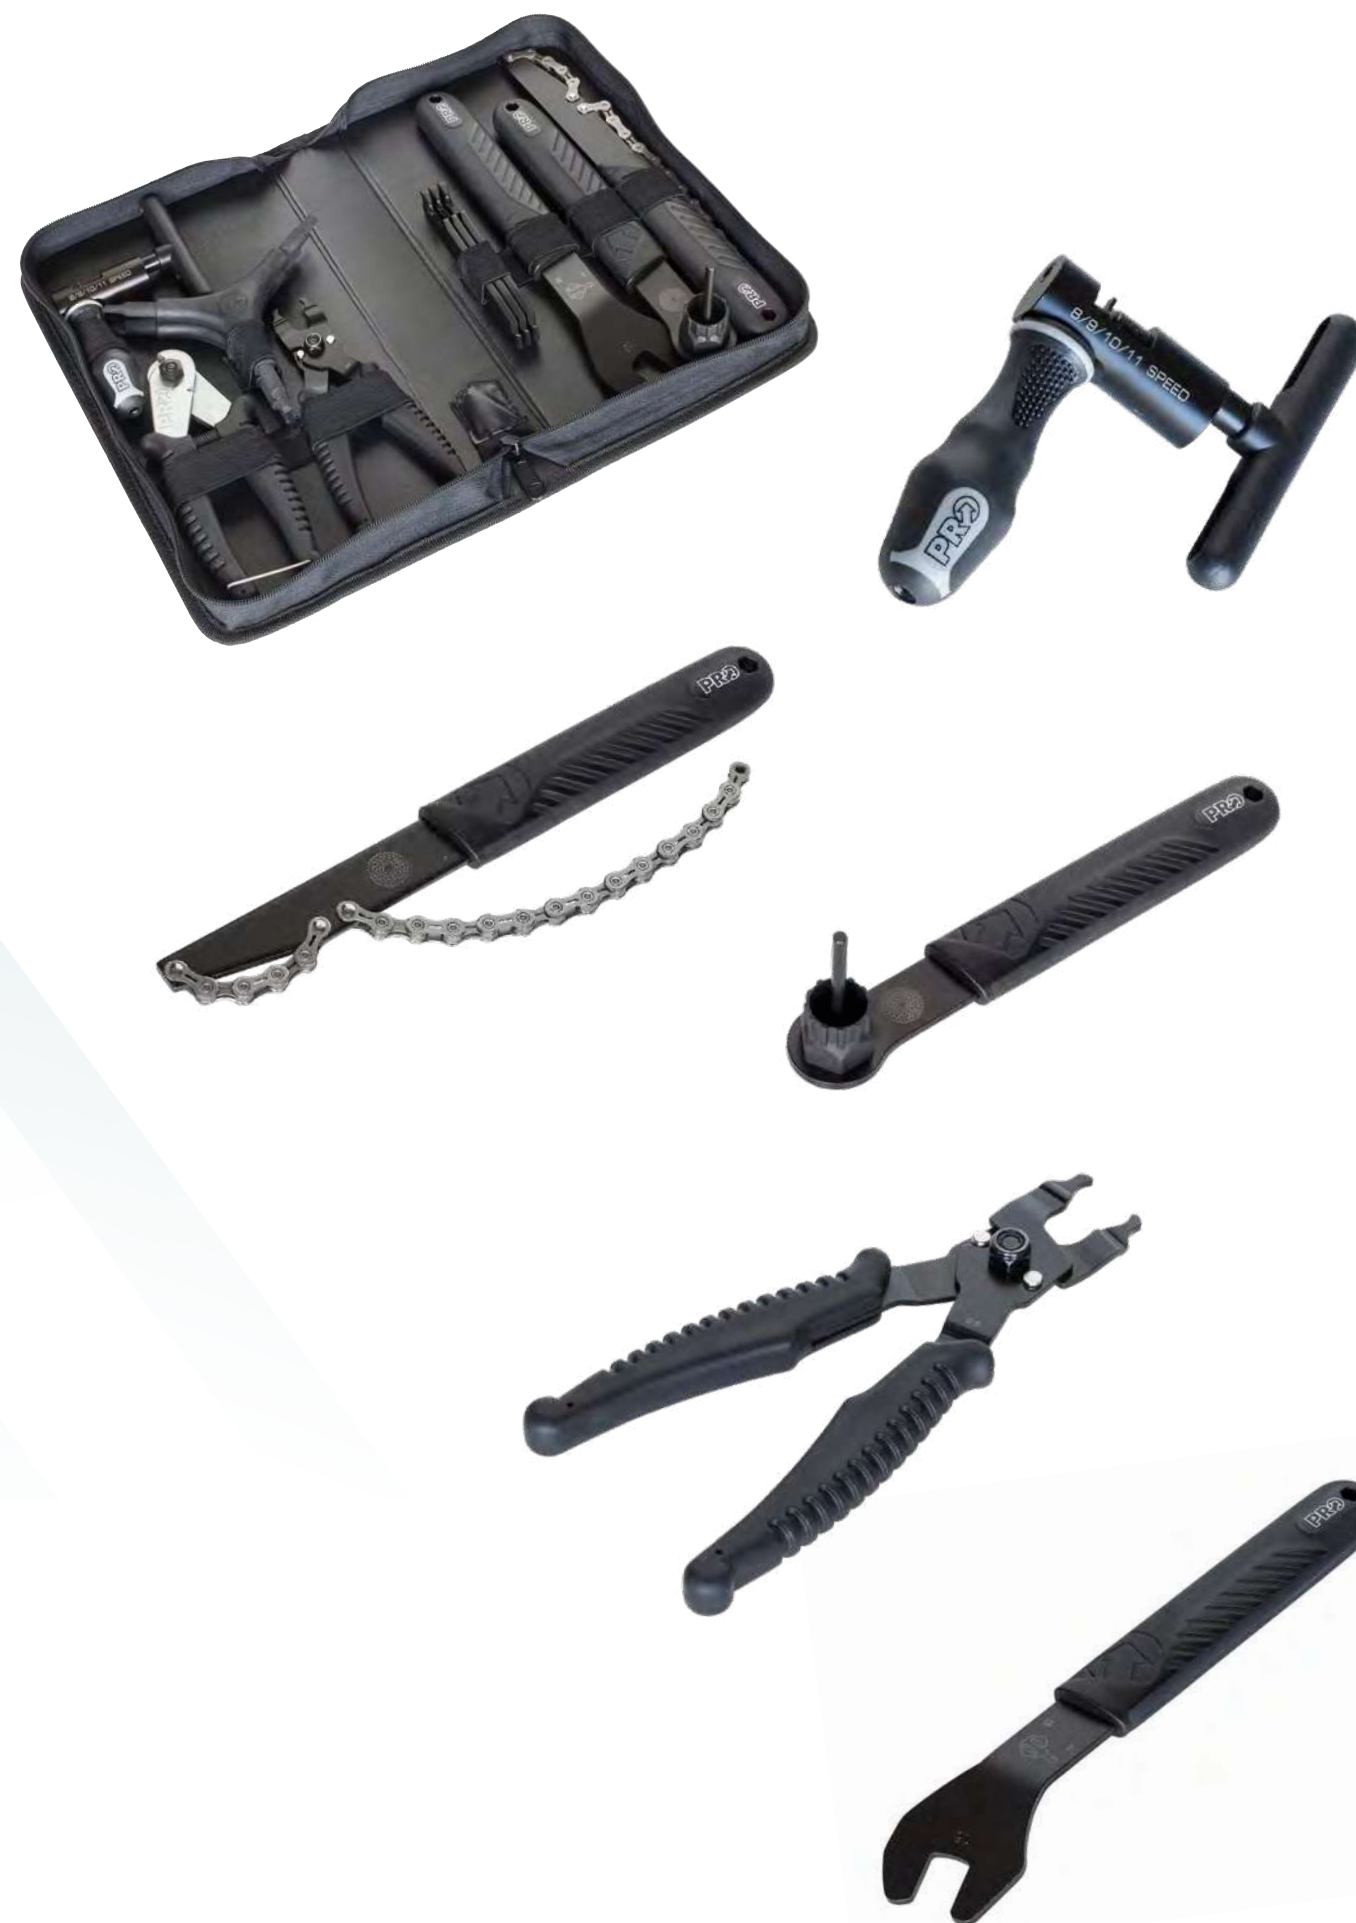

Bikes are evolving all the time, with greater complexity of technology and more rigorous maintenance demands. As a result, riders who do their own repairs are also changing, becoming more savvy and with higher expectations of themselves and their kit. Increasing numbers of cyclists are learning to work on their bikes themselves at home and PRO continues to improve our toolkits, to allow these home-wrenching riders to take the step from beginner mechanic to advanced and expert.

PRO now has three dedicated toolkits for the home mechanic, reflecting the differing needs and their level of technical expertise. Our Starter, Advanced and Expert toolkits cater for those at differing stages of their development, and encourage them to take the steps between each. For the newbie, there's no point having ten tools in their box that they can't even name, let alone know how to use. For the rider who never wants to spend another cent on maintenance, having to go to the bike shop because they lack the right tool is a bitter pill to swallow.

From the starter mechanic to the most demanding, those requiring the absolute best for all maintenance needs, PRO's toolkit range has been completely re-defined, matching the contents to the latest bikes and technology, while also improving the look and feel of the line up. There's no better way to develop the relationship between bike and rider. Let the spannering begin!

GRIPS COLOUR CHANGE

A large number of current PRO tools have black/blue grips. This colour selection will change, with the vast majority of tools all getting full black grips. As a result, there will be different versions of the same tools available, some with black/blue grips and some with the newly updated full black grips. In the following pages we've indicated which versions will be available.

PRO TEAM \ TOOLS

TOOLS FOR PREMIUM COMPONENTS

- EXTRA DURABLE HEAT TREATED STEEL
- LASER CUT FOR OPTIMAL PRECISION AND ACCURACY
- ERGONOMIC DUAL COMPOUND GRIP
- ALLOY SLEEVE FOR INCREASED STIFFNESS
- LONGER DESIGN FOR INCREASED LEVERAGE
- TEAM TOOLS ARE 12 SPEED COMPATIBLE

PRO TEAM CHAIN TOOL

ACCESSORIES

There's more to a bike than a frame and two wheels. It's about the way that bike feels, how you interact with it, what it can do and where it can take you. Ever heard someone say they love their bike? Then you know what we mean.

PRO's range of accessories develops that bond between bike and rider. For gravel riders our new Gravel Comfort handlebar tape completes the PRO cockpit with a super-comfortable and grippy feel. Available in black or multi-colored and compatible with PRO DISCOVER handlebars, it's just what you need to connect with the trail ahead.

Our range of bottle cages and grips, suitable for gravel, road, MTB and e-MTB riding, allows our riders to customise their bike and make it the best it can be. And if they truly love their e-bike, we've developed our PRO (E)Bike Protection, providing frame, display and crank protection and a battery cover to protect from the inevitable knocks and bumps.

PRO understands what a bike means. By providing all they need, we give our riders the extra accessories to make that love affair even stronger.

PUMPS & CO2

When you push the boundaries, sometimes things go wrong. Punctures are a fact of life for those of us who love to adventure, and with more and more of us riding larger volume tyres on gravel tracks, a perfectly functioning pump gives you what you need to get back on the trail quickly. You're here to ride your bike right? So get that flat fixed and jump back in the saddle.

PRO CO2 inflators are small and lightweight, ideal for a saddlebag or jersey pocket and packing enough punch to get you riding again in a flash. For mountain bikers, e-bike users, gravel riders and roadies using larger and larger tyre widths a CO2 inflator makes absolute sense, allowing them to achieve maximum pressure in minimum time.

PRO now offer more CO2 products than ever, giving riders the best tools to get going in a jiffy. The Team CO2 minipump offers the best of both worlds, a combined minipump and CO2 inflator for maximum convenience with a 'flip-head' for valve compatibility.

We've also completed the minipump line-up with the Team HP minipump, providing riders with a high-pressure pump, suitable for wider tyres and compatible with Presta and Schrader valves.

PRO TEAM HP MINIPUMP

NEW

11 BAR | 160 PSI

SLEEK, SLIM & LIGHT MINIPUMP

- LIGHTWEIGHT MINIPUMP
- WITH CONVENIENT HOSE
- "FLIP HEAD" FOR VALVE COMPATIBILITY
- ALLOY ANODIZED BODY
- WEIGHT: 85 GRAMS
- MAX. PRESSURE: 11 BARS
- SIZE: L 18 CM X DIAM. 1,85 CM
- VALVES: PRESTA & SCHRÄDER
