98 anos de história e conhecimento cerâmico!

98 años de historia y conocimiento cerámico!
98 years of history and ceramic know how!

A ARCH é uma empresa instalada na região do Porto (Portugal) que produz e vende todos os artigos com marca Valadares para mais de 50 Países. Ao longo de quase um século a Valadares foi construindo uma marca sólida, hoje internacionalmente reconhecida pela qualidade e pela inovação.

O projeto ARCH - Advanced Research Ceramic Heritage pretende ampliar a dimensão internacional da marca Valadares e apostar numa estratégia fortemente orientada para os seus clientes e para agilidade em se adaptar aos desafios de um mercado com muitos fatores de mudança. Aliando a tradição à inovação e ao design, a produção dos artigos Valadares é garantida a 100% em Portugal pela ARCH , que pretende inovar na indústria cerâmica de sanitários através do desenvolvimento de novos materiais - Gresanit e HighCer - e soluções técnicas orientadas para a sustentabilidade e a eficiência ambiental. A produção de artigos à medida, para projeto de cliente ou para fins técnicos específicos é outro argumento importante que habilita a Valadares a uma resposta versátil e adaptada às mudanças do mercado. Hoje a Valadares é a fusão entre a personalidade do seu passado e a ambição de moldar o futuro em novos caminhos. Sejam bem-vindos.

ARCH es una empresa ubicada en la región de Oporto (Portugal) y que produce y vende todos los artículos con la marca Valadares a más de 50 países. A lo largo de casi un siglo Valadares fue construyendo una marca sólida, hoy internacionalmente reconocida por la calidad y la innovación. El proyecto ARCH - Advanced Research Ceramic Heritage pretende ampliar la dimensión internacional de la marca Valadares y apuesta por una estrategia fuertemente orientada a sus clientes y para agilidad en adaptarse a los desafíos de un mercado con muchos factores de cambio. Combinando la tradición a la innovación y al diseño, la producción de artículos Valadares están garantizados 100% en Portugal por ARCH, que quiere innovar en la industria de la cerámica sanitaria mediante el desarrollo de nuevos materiales - Gresanit y HighCer - y las soluciones técnicas orientadas a la sostenibilidad y la eficiencia ambiental. La producción de artículos a medida, para proyecto de cliente o para fines técnicos específicos, es otro argumento importante que habilita Valadares a una respuesta versátil y adaptada a los cambios del mercado. Hoy Valadares es la fusión entre la personalidad de su pasado y la ambición de moldear el futuro en nuevos caminos. Sean bienvenidos.

ARCH is a company located in the region of Porto (Portugal) that produces and sells all Valadares branded products to more than 50 countries. Over almost a century Valadares was building a solid brand, today internationally recognized for quality and innovation. The ARCH project - Advanced Research Ceramic Heritage - aims to expand the international dimension of the Valadares brand and focuses on a strategy strongly oriented to its customers and in the agility in adapting to the challenges of a market with many factors of change. Combining tradition with innovation and design, the production of Valadares products is 100% guaranteed in Portugal by ARCH, which aims to innovate in the sanitary ware industry by developing new materials - Gresanit and HighCer - and technical solutions oriented towards sustainability and environmental efficiency. The production of tailor-made articles for customer design or for specific technical purposes is another important argument that enables Valadares to a versatile and adapted response to market changes. Today Valadares is the fusion between the personality of its past and the ambition to mould the future in new ways. Be welcome.

Inovação na Valadares!

Innovación en la valadares!
Innovation at valadares!

A Cerâmica é um dos melhores materiais criados pelo homem e um dos que tem maior campo de aplicações em diferentes domínios. A sua produção é delicada e exigente e sempre suportada em elevado conhecimento técnico de matérias-primas e processos de transformação evoluídos. Os 98 anos de trabalho em Cerâmica da marca Valadares, constituem a razão do domínio dos processos Cerâmicos de que hoje a ARCH é detentora. Esse capital de conhecimento permite já a conceção integral das suas peças, entre o Design e a conceção do seu equipamento industrial. A este argumento acrescenta a condição excepcional de se diferenciar pelos materiais cerâmicos com que fabrica os artigos Sanitários com durabilidade atestada por 20 anos de garantia técnica. O Sanitário é, entre os ramos da Cerâmica, o mais exigente no apuro técnico da sua produção, pois a dimensão dos artigos e segurança de utilização obrigam a um domínio perfeito das melhores técnicas a quem se lança o desafio de industrializar este processo. Assim se percebe o baixíssimo número de produtores de Sanitário em todo o mundo e ainda mais reduzida a lista dos que se atreveram a investir na conceção interna dos seus modelos e tecnologia. No caso da Arch é assim que nos posicionamos. Por esse motivo a I&D é uma característica fundamental da nossa prática interna e plataforma para a criação de novos materiais, produtos sanitários e na conceção da tecnologia que utilizamos. Somos uma empresa experiente, mas inconformada. Sabemos que a liderança se faz de inovação e capacidade técnica ao que a ARCH acrescenta a paixão. Sejam bem-vindos ao nosso mundo.

La cerámica es uno de los mejores materiales creados por el hombre y uno de los que tiene mayor campo de aplicaciones en diferentes dominios. Su producción es delicada y exigente siempre soportada en alto conocimiento técnico de materias primas y procesos de transformación evolucionados. Los 98 años de trabajo en Cerámica de la marca Valadares, constituyen la razón del dominio de los procesos Cerámicos de que hoy la ARCH es poseedora. Este capital de conocimiento permite ya la concepción integral de sus piezas, entre el diseño y la concepción de su equipamiento industrial. A este argumento añade la condición excepcional de diferenciarse por los materiales cerámicos con que fabrica los artículos Sanitarios con durabilidad certificada por 20 años de garantía técnica. El Sanitario es, entre las ramas de la Cerámica, el más exigente en el apuro técnico de su producción, pues la dimensión de los artículos y seguridad de utilización obligan a un dominio perfecto de las mejores técnicas a quienes se lanza el desafío de industrializar este proceso. Así se percibe el bajísimo numero de productores de Sanitario en todo el mundo y aún más reducida la lista de los que se atreven a invertir en la concepción interna de sus modelos y tecnología. En el caso de Arch es así que nos posicionamos. Por eso la I&D es una característica fundamental de nuestra práctica interna y plataforma para la creación de nuevos materiales, productos sanitarios y en la concepción de la tecnología que utilizamos. Somos una empresa experimentada, pero inconformada. Sabemos que el liderazgo se hace de innovación y capacidad técnica a lo que ARCH añade la pasión. Sean bienvenidos a nuestro mundo.

Ceramics is considered to be one of the best man-made materials, as well as the one that has the widest range of applications, even within different fields. The production involves detailed and demanding work which it is always underpinned by technical know-how, regarding both raw materials and evolved transformation processes. The Valadares brand has 98 years of experience and know-how and ARCH is now the heir to that knowledge. This allows ARCH to integrally conceive all its production, employing this knowledge from the initial modelling design to the design of the industrial equipment. In addition, the raw materials that ARCH utilises in their production are of exceptional quality, which allows them to have a twenty-year warranty seal on their items. Sanitaryware is, among all the branches in ceramics, the one requiring more knowhow, given the sheer size of the items, as well as the highly important need for safety of use, and a perfect mastery of the best techniques to those who dare to industrialize this challenging process. Therefore, it is easy to understand why there aren't many sanitaryware producers in the world and it's even fewer the list of those who dare to invest in the internal conception of its models and technology. In Arch's case this is how we position ourselves. For this reason, R&D is a key feature of our internal practice, in the materials, products and technology used. We know that the leadership is made of innovation and technical capacity to which ARCH adds passion. Welcome to our world and to our ceramics culture.

Novos materiais que fazem a diferença

Nuevos materiales que hacen la diferencia
New materials which make the difference

VITREOUS CHINA (porcelana sanitária)

A ARCH produz internamente a sua Porcelana Sanitária, com recursos às melhores matérias-primas mundiais e com incorporação de componentes por si especificados e testados, que conferem vantagens características de elevada qualidade estrutural aos seus artigos e níveis de eficiência fabril a ambiental de topo. A Porcelana Sanitária é por definição o material nobre na produção de artigos Sanitários – baixíssima porosidade e elevada resistência - contudo a deformação e retração durante o fabrico dificultam a produção de artigos de maior dimensão.

VITREOUS CHINA (porcelana sanitaria)

ARCH produce internamente su Porcelana Sanitaria, con recursos a las mejores materias primas mundiales y con incorporación de componentes por sí mismos especificados y probados, que confieren ventajas características de alta calidad estructural a sus artículos y niveles de eficiencia fabril y ambiental de primer nivel. La Porcelana Sanitaria es por definición el material noble en la producción de artículos Sanitarios - bajísima porosidad y elevada resistencia - sin embargo, la deformación y retracción durante la fabricación dificultan la producción de artículos de mayor tamaño.

VITREOUS CHINA (porcelain sanitaryware)

ARCH produces their own porcelain sanitaryware, always employing the best raw materials the world can offer and incorporating their own tested and tried components. As such, they produce high quality items with high levels of efficiency and performance, both technical and environmental. Porcelain sanitaryware is, by definition, the noble material in the production of sanitaryware items, due to the extremely low levels of porosity and high levels of resistance. However, technical issues during production – distortion and contraction – represent an obstacle in the production of bigger items.

original bathrooms since 1921

GRESANIT ®

Evolução amiga do ambiente!

O Gresanit® foi desenvolvido pelo departamento I&D da Valadares como resposta à necessidade de introduzir material alternativo ao Fine Fire Clay (vulgar Grés) para produção de artigos de grandes dimensões. Foi então concebido um material cerâmico completamente novo e capaz de superar as limitações dos materiais existentes até então.

Mas o Gresanit® não se reduz a material para fabricar artigos Sanitários em alternativa ao grés comum. A sua introdução abriu espaço a múltiplas aplicações, desde as bases de chuveiro ultrafinas até peças técnicas de aplicações refratárias ou ainda na conceção de revestimentos para utilizações exigentes na área química, biológica e laboratorial.

O Gresanit® tem na sua génese uma forte componente relacionada com a Sustentabilidade Ambiental, pois foi formulado para reintegrar todo o desperdício resultante do seu próprio processamento bem como parte do desperdício do processamento do vitreous-china, tornando-o amigo do ambiente como resultado da reciclagem de resíduos cerâmicos e da diminuição de consumo de matérias primas para o seu fabrico.

GRESANIT ®

Evolución amiga del ambiente!

Gresanit® fue desarrollado por el departamento I & D de Valadares como respuesta a la necesidad de introducir un material alternativo al Fine Fire Clay (vulgar Grés) para la producción de artículos de grandes dimensiones. Fue entonces concebido un material cerámico completamente nuevo y capaz de superar las limitaciones de los materiales existentes hasta entonces.

Pero el Gresanit® no se reduce a material para fabricar artículos Sanitarios como alternativa al gres común. Su introducción ha abierto espacio a múltiples aplicaciones, desde las bases de ducha ultrafinas hasta piezas técnicas de aplicaciones refratarias o en la concepción de revestimientos para usos exigentes en el área química, biológica y de laboratorio.

Gresanit® tiene en su génesis un fuerte componente relacionado con la Sostenibilidad Ambiental, pues fue formulado para reintegrar todo el desperdicio resultante de su propio procesamiento así como parte del desperdicio del procesamiento del vitreous-china, haciéndolo amigo del ambiente como resultado del reciclado de residuos cerámicos y de la disminución del consumo de materias primas para su fabricación.

GRESANIT ®

Eco-friendly evolution!

Gresanit® was developed by Valadares R&D department in response to the need to introduce alternative material to Fine Fire Clay for the production of large items. This completely new ceramic material was designed to overcome material limitations until then. Yet Gresanit® is not reduced to material for manufacturing Sanitary articles as an alternative to ordinary fine fireclay. Its introduction has made room for multiple applications, from ultra-thin shower trays to technical parts for refractory applications or even for design of coatings for demanding uses in the chemical, biological and laboratory areas.

Gresanit® has a strong Environmental Sustainability component, as it was formulated to reintegrate all the waste resulting from its own processing as well as some of the waste of vitreous-china processing, making it environmentally friendly as a result of recycling of ceramic waste and reduction of consumption of raw materials for its manufacture.

Since the beginning, ARCH has adopted the principles of circular economy which was implemented through the reintroduction or regeneration of ceramic waste produced and incorporated in its entire process. This eliminates the need to send waste to the landfill, leading to a significant reduction in the environmental impact from all manufacturing activity.

HIGHCER ®***Um cerâmico altamente resistente!***

A ARCH entendeu que havia espaço para um terceiro material cerâmico da sua autoria que eliminasse a necessidade de revestimento vitrificado (vidrado), ou seja, um cerâmico em que o material possui já o acabamento pretendido pelos utilizadores. Assim foi criado o HIGHCER®, material cerâmico com uma resistência consideravelmente superior a qualquer outro material cerâmico atualmente no mercado, o HighCer® destina-se ao desenvolvimento de produtos de aplicação em revestimentos técnicos ou peças sujeitas a utilização exigente, abrindo um campo de desenvolvimento de soluções para Cozinhas, Hospitais e Escolas ou ainda para a Indústria Farmacéutica. A ARCH adotou, desde o seu nascimento, os princípios de economia Circular que concretizou através da reintrodução ou regeneração de resíduos cerâmicos produzidos e que incorpora integralmente no seu processo. Desse modo é anulada a necessidade de envio de resíduos para aterro, com redução significativa do impacto ambiental da atividade.

HIGHCER® (ARCH)	0,00%	1500	ok	ok	6

HIGHCER ®

Un cerámico altamente resistente!

ARCH entendió que había espacio para un tercer material cerámico de su autoría que eliminara la necesidad de revestimiento vitrificado (vidriado), es decir, un cerámico en el que el material ya posee el acabado deseado por los usuarios. Se ha creado HIGHCER®, material cerámico con una resistencia considerablemente superior a cualquier otro material cerámico actualmente en el mercado, HighCer® se destina al desarrollo de productos de aplicación en revestimientos técnicos o piezas sujetas a uso exigente, abriendo un campo de desarrollo de soluciones para Cocinas, Hospitales y Escuelas o para la Industria Farmacéutica. ARCH adoptó desde su nacimiento los principios de economía circular que se concretó a través de la reintroducción o regeneración de residuos cerámicos producidos y que incorpora íntegramente en su proceso. De este modo se anula la necesidad de envío de residuos a relleno, con reducción significativa del impacto ambiental de la actividad.

HIGHCER ®

Higher resistance ceramic material!

ARCH believed that there was room for a third ceramic material of its own that would eliminate the need for vitrified (glazed) coating, in other words, a ceramic in which the material already has the desired finishing by the users. Thus, has been created HIGHCER®, a ceramic material with a considerably higher resistance than any other ceramic material has currently on the market. HighCer® is intended for development of products for application in technical coatings or parts subjected to demanding use, opening a field of development solutions for Kitchens, Hospitals and Schools or for the Pharmaceutical Industry. Since its inception, ARCH has adopted the principles of circular economy that it has implemented through the reintroduction or regeneration of ceramic waste produced and incorporated in its entire process. This eliminates the need to send waste to the landfill, with a significant reduction in the environmental impact of the activity.
