WOOD, A NATURAL CHOICE

A wood floor brings a special character that enhances a room whatever life or activity it contains. Designing a floor requires taking time to think about not only what looks good, but also what lasts the test of time to bring a stylish, functional and beautiful setting to your everyday.

By tracking consumer trends, understanding changing lifestyles and mastering new technologies, we have crafted a collection that makes it easier for you to find the floor to suit your needs and aspirations. In these pages, you'll find everything from classic to contemporary designs, interior inspiration and practical guidance on installation, care and accessories.

GENUINE CRAFTSMANSHIP SINCE 1886

THAT THE STORY OF TARKETT should have its roots in Sweden – a land rich in forests – is not so strange. From it has sprung a passion for wood and the skills of transforming it for the basic human needs of housing, furniture and flooring. From the beauty of nature to the hand of an expert, this know-how has passed from generation to generation of men and women in Tarkett ever since.

Tarkett's history began in the late 1880s in a small carpentry shop in Malmo, Sweden that created parquet planks from local oak and beech trees. Soon this thriving company introduced innovations like the Linderman board – a way of joining parquet strips together to make them easier to install, as well as multi-layer parquet that revolutionized the industry by counteracting the natural movement of wood due to humidity. It's a technique that still forms the basis for the European standard for parquet flooring.

This wood expertise helped drive expansion beyond Sweden in the 1950s to neighbouring markets across Europe by the late 1960s. By 1967, the company had become Tarkett with production still in Sweden – at Hanaskog.

Fastforward to today and the little carpentry workshop has become a leading flooring group with manufacturing sites spread across the world. While production has been transformed by modern means, the fundamental knowledge and craftsmanship remains. In choosing Tarkett, you get much more than just a wooden floor. You gain an experience.

FIND YOUR STYLE IN THIS YEAR'S COLLECTION

Discover the natural beauty and variety in our new collection of wooden flooring, developed around interior decoration trends and styles of today and tomorrow.

Be inspired by timeless design and distinctive craftsmanship. Or hardwood floors with powerful character and special finishing touches. There's a wide spectrum of choice in colour and expression.

ATELIER reflects a trend evoking classic tastes through toned-down luxury with more than a touch of extra care and attention. Inspiration is drawn from authentic and time-worn materials – new or even salvaged – which bring a new calibre of expression.

The quest for a simpler and more wholesome way to live brings us a more eco-conscious yet cultivated style where tradition comes before trend. Key words are harmony and conviviality. Materials and décors are natural, without sacrificing modern convenience and aesthetics.

SHADE offers an elegant selection of warm and natural colours to bring a variety of soft and soothing designs to your interior decoration.

PURE celebrates the authentic designs of nature at its best, with extra finishing touches to enhance the unique character of every plank for an ever-lasting style.

PLAY is where wood floors get that little bit more creative with colour and character. If you're looking for expression, here's where you can find a floor with something to say.

VIVA is a beautiful and highly resistant wood flooring that will stand the test of time and is a perfect solution for every renovation project.

Heritage Oak Old Brown - 41007004

ATELIER is a prestigious collection of exclusive engineered wood flooring that brings a new level of craftsmanship, quality and expression to interior design.

For beauty, strength and character, Atelier sources wood that offers a unique ambience in all its natural details. Through special rendering, every plank can become a living art with a beautiful patina that brings a lived-in and loved feel over time.

Elegance Oak - 41008001

ATELIER

NOBLE

Noble is a modular floor, inspired by the long tradition of classic parquet.

Noble is a design that reinterprets a classic modular technique of the 1950s. With brushing and hardwax oil finish it creates an interplay of light that changes according to your position and perspective as the light falls in the room. The result is an exciting dynamic between the floor and its surroundings, for an effect that is both timeless and on trend.

The extension is a tribute to classic floor constructions with elegant and more contemporary colour and brushing. Each squared lamella is applied by hand to Tarkett's engineered, layered construction. Alternating grain directions, small variations and designed misalignments give every board a flare of uniqueness and exclusivity typical of all handcrafted work. We call it "Perfect imperfection".

ELEGANCE

**Exclusive wide and long planks.
Nature's own design determines
their unique character.**

Elegance's wide, extra long, extra thick planks stretch out to shape perspectives and bring a serene ambience to a room. Its natural beauty, with all the cracks and knots of the wood, is enhanced through hand-crafted elements like bevelling. Its hardwax oil finishing highlights each plank's distinctive grain and structure. A harmonious combination of design and decoration in a floor that brings depth, beauty and sophistication to any room.

ELEGANCE

ATELIER

PRESTIGE

A sophisticated and naturally worn look. As if Prestige planks had been left to be worn by wind and weather.

Prestige celebrates nature's creation and wood's intrinsic strength and power to stand the test of time. Careful brushing enhances the structure and patina of the wood, as though it had been weathered by sun, sand and wind. The effect is a smooth and rustic appearance— like an old wooden bench on a windswept promenade by the ocean, season after season.

ATELIER

HERITAGE

Heritage introduces nature's styling at its best – a genuinely rustic oak. Natural details that give floors a feeling of century-old patina.

Not so long ago, some raw oak materials were not considered to have the right look for flooring. Now, this rustic, grainy wood is sought after more than ever. And the larger the shape or depth of the cracks, knots and natural colour variations, the better! The wood grains are enhanced with brushing and staining to emphasize the beautiful details that make each plank unique.

Heritage Oak Dove Grey - 41007015

Partial saw marks and special treatment give the wood an appealing worn look of a floor with a story to tell

ATELIER

VINTAGE

Floors with history. Woodworking traces, from saw marks to indentation, give added personality and a sense of time gone-by.

Vintage combines the charm and detail of old wooden floors with all the benefits of modern flooring for a lived-in look from day one. The worn surfaces you might find in second-hand furniture or salvaged flooring have been recreated. Saw marks, indentations or other distressed details make the floor seem as if it's been walked over for years and years. Add the hardwax oil and each floor will tell you its very own history for generations to come.

┌ Vintage floors have unique surface effects

Viva Oak – 7828001

└ The handy, shorter lengths make Viva's veneer floors easy to carry home as well as to install

DOING THE RIGHT THINGS FROM THE VERY BEGINNING

By 2050, there will be 9 billion people in the world, with 3 billion new middle class consumers looking for a higher quality of life. Earth's resources are limited, so we have to work harder to find new sustainable solutions where people, the environment and economic development are equally important.

At Tarkett, we do not see sustainability as a constraint. Instead, it inspires us to think afresh in everything we do. We develop resource-efficient products that are designed to be reused and recycled with the minimum impact on the environment over their lifetime. In essence, it's about doing the right thing from the start.

DISCOVER BELOW OUR SUSTAINABILITY APPROACH and find out more at www.tarkett.com

GOOD MATERIALS

We choose good materials when designing our products that respect people's health and the environment and can be either reused safely by nature (biodegradation) or industry (recycling) at the end of product use.

RESOURCE STEWARDSHIP

Our objective is to reduce and optimize the use of resources at every step of the manufacturing process, maximizing operational efficiency while minimizing our contribution to the issue of resource scarcity faced by our world today.

PEOPLE FRIENDLY SPACES

Our floors contribute to a safe and healthy environment for people to live, work and spend time in. They are comfortable to walk on, provide good acoustic characteristics and are easy to keep clean.

REUSE AND RECYCLE

At Tarkett, products no longer have an end of life, but an end of use. We transform what used to be defined as "waste" into even higher quality resources and innovative new products.

MOVING TO A CIRCULAR ECONOMY

Since 2011, Tarkett has been committed to moving from the historical linear economy, with its one-off use and disposal of resources, the traditional consumption model, to a profitable circular economy model in which resources are recycled and reused.

CRADLE TO CRADLE™

Our Cradle to Cradle® approach ensures we design our products to contribute positively to the environment and to people's well-being at each step of the product's life, while supporting the development of the circular economy. Cradle to Cradle® is a multi-attribute, continuous improvement standard. Products are evaluated across five categories of human and environmental health:

Material Health: Made with materials that are safe for humans and the environment.

Material Reutilization: Designed so that all ingredients can be reused safely by nature or industry.

Renewable Energy and Carbon Management: Assembled and manufactured with renewable, non-polluting energy.

Water Stewardship: Made in ways that protect and enrich water supplies.

Social Fairness: Corporate compliance to social responsibility at every level including manufacturing and enforcing fair treatment of workers.

All our parquet floors from 10 mm thickness are Cradle to Cradle® certified.

MORE EXAMPLES FROM OUR ENVIRONMENTAL APPROACH

- We support sustainable forestry and biodiversity.
- More than 60% of our wood is FSC® or PEFC™-certified.
- Our wood flooring factories are certified according to ISO 14001 and ISO 9001.
- Over recent years Tarkett has focused on reducing VOC emissions (volatile organic compound). All hard wood floors have emission levels that are well below valid EU standards and norms.
- Our floor coatings have long been completely solvent-free.
- All Tarkett wood flooring is handled with gentle and dry cleaning methods without the need of strong cleaning chemicals.
- After use, the wood floors from Tarkett are compostable material and can become part of the biological cycle.

SUSTAINABILITY LABELS FOR ALL PRODUCTS

Tarkett's sustainability label gives you information on what the floors contain and how they contribute to sustainable development. How to read the label:

WOOD SPECIES

- 1 OAK** (*Quercus*) Highly valued and widely used for interior decoration due to its performance. Lighter sapwood and knots enrich its different nuances of brown. With heat treatment it gains exotic darker tone.
- 2 ASH** (*Fraxinus*) Thanks to its toughness and resilience, it is highly suited to high strength applications. Strong contrast between dark heart wood and light sap wood often results in a lively pattern with rich variety of shades.
- 3 MAPLE** (*Acer*) As one of the hardest light wood species, it is highly resistant to wear. Maple has calm and even shades. Its grain is straight with fine, even texture completed by curly growth rings
- 4 BEECH** (*Fagus*) is hard and durable. Due to its cell structure, movements in beech are stronger than in most other wood species. Uniform appearance and elegant warm yellow nuances are characteristic for Beech.
- 5 BIRCH** (*Betula*) This Scandinavian wood is very light and has a calm tone with deep reflective luster. It is slightly soft and is not recommended for busy areas. Nuance difference between grains is nearly invisible.
- 6 WALNUT** (*Juglans*) has excellent wood working properties thanks to its softer characteristics. Colour varies from light brown to warm dark chocolate tone and sapwood is creamy-white. Walnut brings a strong character to the floor.

DIFFERENT TYPES OF WOOD HAVE DIFFERENT HARDNESS

The common method of measuring the hardness of different types of wood is known as the Brinell test. A small steel ball is pushed against the surface of the wood using a heavy load. The Brinell number is determined by how large an indentation has been made in the wood. The higher the Brinell number, the harder and more resistant the wood is to indentation. Since wood has natural variations in structure, the different parts of the wood may vary in hardness. The Brinell numbers given are average numbers based on several tests.

*Viva has a high Brinell number because the hard core of HDF absorbs the force of the Brinell ball.

WOOD FLOORS FOR ALL SEASONS

A wood floor is a living, natural material that shrinks or swells depending on temperature and humidity. In zones with cold winters, we heat our homes resulting in a dry indoor climate. This contracts the grain and the wood shrinks. The wood expands again in the spring. The changes in relative humidity can cause damage to wooden floors, which can crack or become cupped. Tarkett has been making wood floors for more than 125 years and knows how to minimize these negative effects.

UNDERFLOOR HEATING FOR INCREASED COMFORT

When installing wood flooring on heated subfloors, it is essential that surface temperature never exceeds 27° and that the chosen system provides equal heating throughout the entire floor surface, including rugged areas. Please also note that underfloor heating can cause gaps between the floorboards during winter. Some wood species and constructions are more prone to movements and are, therefore, not recommended for underfloor heating. For details read our product datasheet on tarkett.com. All other types of wood are suitable when respecting the above instructions.

ADAPTED MANUFACTURING PROCESS

We take into account the changes in the wood throughout the entire manufacturing cycle to minimize movement in the finished wood floor. An advanced drying process is essential to ensure high product quality and can sometimes take up to one year.

HELPFUL CONSTRUCTION

To minimize natural movements, our wooden floors are built up in three layers. By alternating the direction of the fibres in these layers, movements in the wood are minimized and this creates a balanced and stable floor. Our strong glueless locking system locks the boards tightly against one another without any gaps.

WOODEN FLOORS CHANGE COLOUR

Wooden floors change colour as the wood ages. The wood is also affected by the ultraviolet rays of the sun. This can clearly be seen if you move a rug that's been down for a while. Some types of wood, walnut for instance, change colour within a matter of weeks, while others take a little longer. Walnut gets lighter with a reddish tone while other species attain a more golden shade. Please check the documentation section of our website for more information.

2-LOCK MAKES IT EASY AND QUICK!

Using 2-lock makes it is simpler than ever to lay wooden floors. The secret is a small spring in the ends of the floorboards. When you press down the board the spring locks the two boards together. It is quick and the board stays put. Follow the instructions and you can easily lay a floor in an average-sized room in less than a day.

Our super wide and large **Elegance** planks, come with a tongue and groove system for a glue-down installation.

Our **Viva** ranges come with the Ultra-loc installation system.

For complete installation instructions or further details, please visit www.tarkett.com or contact your Tarkett retailer.

WOOD FINISHES

When using your wooden floor, you primarily wear the surface treatment, not the wood itself. For this reason, a wooden floor needs good protection against wear, abrasion, scratches and stains if it is to retain its good looks for a long time. Wooden floors from Tarkett have Proteco, one of the strongest protections on the market. Proteco comes in three varieties which each will provide a different feeling to the floor.

PROTECO LACQUER

Semi-gloss lacquer is applied in six layers. Exactly the right amount of lacquer is applied – not too thick and not too thin – to make the floor extra hard-wearing.

PROTECO NATURA

Matt lacquer, which is applied in the same way as the semi-gloss lacquer is just as hard-wearing and gives equally effective protection. It will retain the natural colour and feel of the wood, just like an oiled floor. It will require a little more care, as a matt surface always attracts more dirt than a semi-gloss lacquer.

PROTECO HARDWAX OIL

Hardwax oil contains oils from sunflower, linen and soy. It provides a silky matt surface, reinforcing the feeling of the wood. The oil penetrates into the wood while the hardwax remains on the surface and provides extra wear protection. Like all other oiled wooden floors, it must be 'maintenance-oiled' every two or three years. It also requires somewhat more care than a lacquered floor.

SURFACE AND BEVELS

A BRUSHED FLOOR GIVES AN ADDED FEELING OF WOOD By using different brushing methods, the beautiful, natural structure of the wood is further enhanced. Adding saw or indentation marks, gives the floor a more vintage look and feel. Flooring with these kinds of surface effects will also develop a more weathered-looking patina over time.

BRUSHED

Slight brushing to polish the wood pattern and to strengthen the visual differences of wood fibers, without getting too deep.

DEEP BRUSHED

Semi-structural brushing that enhances rustic impression.

ANTIQUE BRUSHED

Structural brushing to gain relatively deep yet smooth surface, playing with the density of the timber and highlighting every natural detail.

PARTIAL SAW MARKS

A fully random effect where depth and position of saw marks vary to create a very natural final result. The marks cover mainly long side edges.

FULL SAW MARKS

Rustic and re-cycled design thanks to sawing effects covering the entire width of the board.

INDENTATION MARKS

Camouflage effect that makes the floor very adapted to wear and tear, as dents – a part of a floor's natural finish – will be highlighted.

BEVELLED FLOORS FOR THAT LITTLE BIT EXTRA!

Bevelling, from smooth to deeper versions emphasizes and reinforces the overall plank design.

INSTALLATION

1 BEFORE YOU BEGIN

Make sure the subfloor is level, firm, dry and clean. The temperature and humidity must be correct before, during and after installation. You must not open the packs until immediately before installation.

TARKETT START-UP KIT

Simple and practical tools to install your floor

2 SUBFLOOR PREPARATION

USE TARKETT UNDERLAY MATERIAL

For a floating installation - when the wooden floor is joined together without being attached to the subfloor - you should use an underlay material to level the surface, optimize sound performance and increase walking comfort. Tarkett Tarkofoam II and Tarkoflex II meet all these criteria.

REMEMBER THE VAPOUR BARRIER!

A vapour barrier is a polythene foil that prevents humidity migration from the sub-floor to the wood floor. It is applied over the entire subfloor and should be laid with an overlap of at least 200 mm. The underlay material Tarkoflex II also acts as a vapour barrier.

Underlay material		Material code	Packaging
Felt paper	Used on wooden surfaces to reduce small unevennesses in the subfloor and as a sound absorbent material.	8790300	63x15 m ²
Tarkofoam II 2mm	Underlay material which reduces the sound of footsteps. Freon free	8790315	1x70 m ²
Tarkofoam II 2mm		8790314	28x15 m ²
Tarkoflex II 2mm	Underlay material which reduces the sound of footsteps, with 0.1 mm PE foil as moisture barrier. Freon free	8790312	22x15 m ²
Tarkoflex II 2mm		8790316	1x70 m ²
Vapour barrier 0,2mm	Polythene foil insulation	8790307	50x67,5 m ²
Protective covering paper	Protects the floor against paint, scratches, etc.	8790308	40x75 m ²

3 INSTALLATION PREPARATION

➤ Decide the installation direction. Take a look at the way the light falls and the shape of the room. It's easier on the eye if the planks run in the same direction as the light. If the light falls in from several angles, follow the longest wall.

➤ Open a few packages during installation to create a harmonious color transition.

➤ Expansion gaps must be planned along fixed points such as walls, thresholds, radiator pipes and stairs. There must be no contact between floors in different rooms unless the floor is glued down. Large areas of floor must be divided up into smaller areas with the use of expansion gaps. The gaps and transitions between different floors can easily be hidden using skirtings, mouldings and collars.

Installation	Material code	Packaging
Floor adhesive D3	8790100	12x0,75 l
Parquet adhesive D	8790102	1x14 kg
Parquet adhesive MS	8790107	1x15 kg

CARE & MAINTENANCE

CARE FOR YOUR WOODEN FLOOR

The feel of a new wood floor is something you will want to maintain as long as possible. That's why you should care for your wooden floor with "love and consideration". Tarkett offers smart and effective floor care products to maintain the lustre of wooden floors for a long time.

For daily care it is enough to vacuum or clean the wooden floor with a dry mop. The **Tarkett Wood Floor Care Kit** for lacquered floors is perfect for this. It has a comfortable design with a telescopic handle, a microfibre cloth and a velcro fastener. Sometimes you may need a little liquid to remove dirt and stains. But it is also important not to use too much water. **Tarkett Wood Floor Spray Cleaner** for lacquered floors is easy and simple to use on these occasions, and the floor also dries more quickly.

If you want to use both, we have the Tarkett Spray Mop Kit for lacquered floors with a refillable liquid container.

BIOCLEAN for lacquered floors and **BIOCLEAN** for hardwax oil floors: Lasting, effective and biologically degradable general cleaner, which can be used for regular cleaning.

REFRESHER for lacquered floors: Protects and strengthens the floor surface, also preventing micro-scratches.

REFRESHER for floors treated with hardwax oil: Keeps the floor fresh and strengthens the surface against wear thanks to the hardwax it contains. It can also be used for parts of the floor that are subject to heavier wear.

Care & Maintenance		Material code	Packaging
Refresher for lacquered floors	Protects lacquered wooden floors. Fills in microscratches and strengthens the lacquer surface.	8792111	12x1 l
Refresher for floors treated with hardwax oil	Protects, strengthens and cleans wooden floors treated with hardwax oil.	8792209	6x1 l
Bioclean for lacquered floors	Lasting and effective universal cleaner. Biologically degradable.	8792120	12x1 l
Bioclean for floors treated with hardwax oil	Natural cleaning and maintenance concentrate. For regular cleaning and care. Biologically degradable.	8792123	12x1 l
Spray Cleaner	For daily cleaning of lacquered, hardwax oiled or oiled wooden floors and laminates.	8792204	10x0,75 l
Care Kit for wooden floors	Consists of Spray Cleaner, microfibre mop and mop handle.	8792205	9x1
Spry Mop Kit	Consists of Spray Mop, Refill Spray Mop Kit, microfibre mop.	8792206	1x1
Refill Spray Mop Kit	Refill for container in Spray Mop Kit.	8792207	6x1 l
Microfibre mop	With velcro fastener.	8792208	10x1

TIPS TO PROLONG THE BEAUTY OF YOUR FLOOR

Use furniture pads which minimize scratches.- A rug for wiping feet in the hallway also stops dirt.- Use protective chair mat against wear from castor chairs.

		Material code	Packaging
Furniture pads, self adhesive	20 mm	8792300	10x1
	28 mm	8792301	10x1
	10 cm x 15 cm x 3 mm	8792302	10x1
Furniture pads, nail-in	22 mm	8792310	10x1
	37 mm	8792311	10x1
Chair mat	100 x 120 cm	8792320	1x1
	150 x 120 cm	8792321	1x1

GOOD TO KNOW

Very rustic floors with cracks and surface effects such as saw marks and indentation marks react more to variations in relative humidity. They shrink in dry indoor climates and expand when the humidity increases. In the first year, particularly in winter, these floors (like Atelier Heritage for example) need some extra care, they should be refreshed with Tarkett Refresher (for floors treated with hardwax oil) which efficiently penetrates into cracks and effects and protects the whole surface.

The pictures only present the color of the floor. For more details regarding grades and variations check Tarkett Grading Book or www.tarkett.com. Although every care has been taken to reproduce images that reflect the finished product, the quality of monitors and printers and the very nature of wood may result in variations in the color and structure of individual planks. Tarkett's international range of wooden floors comprises many different products. Some of these may not be for sale in your country.
