Volle Kraft sofort

Dynamik mit Leichtigkeit – das ist eines der vielen Merkmale, die das E-CORE auszeichnen. Angetrieben vom Shimano Steps E8000 Motor verfügt das BULLS E-Fully über bestmögliche Trittmunterstützung in jeder Fahr-situation. Wird es plötzlich steil, stellt der Antrieb verzögerungsfrei die maximale Power zur Verfügung. Wird er dagegen nicht sonderlich gefordert, fährt sich das E-CORE leicht wie ein gewöhnliches MTB. Das führt zu einer herausragenden Energieeffizienz und echten Flow-Erlebnissen.

Doppelte Reichweite und Connected Bike Technologie auf Wunsch

Ein Akku oder doch lieber zwei? Mit dem Twin Core Konzept bietet BULLS alle Möglichkeiten. Ob standardmäßig mit 375 Wattstunden Akku oder optional mit der doppelten Leistungskapazität, den Ansprüchen und Anforderungen sind beim E-CORE kaum Grenzen gesetzt.

Ausgestattet mit technischer Brillanz und maximalem Federweg

Die technischen Finessen machen auch vor den weiteren Komponenten des E-CORE EN Di2 27,5+ nicht halt. Ausgestattet mit Shimano Elektronikschaltung wird jeder Gangwechsel im Zusammenspiel von Di2 und Shimano Antrieb zum echten Genuss. 180 mm Federweg und ein Fahrwerk mit Fox Float Dämpfer und RockShox Lyrik Gabel lassen Fahrer im Gelände schon nach der nächsten Herausforderung suchen.

Full power, immediately

Easy dynamics – This is one of the many features that characterise the E-CORE. Driven by the Shimano Steps E8000 motor, the BULLS E-Fully has best pedalling support in any cycling situation. If the path suddenly turns steep, the drive provides maximum power without delay. If, in contrast, it is not experiencing a particularly high strain, the E-CORE moves as easily as a common MTB. This ensures outstanding energy efficiency and true flow experiences.

Double range and Connected Bike technology on request

One battery, or two? BULLS offers all options with the Twin Core concept. With the default 375 Watt-hours battery, or optionally with the double power capacity: the E-CORE hardly has any limits at all where demands and requirements are concerned.

Equipped with technical brilliance and maximum deflection

The technical details encompass the other components of the E-CORE EN Di2 27,5+ as well. Equipped with the Shimano electrical gearshift, every gear change becomes true enjoyment in interaction of the Di2 and Shimano drive. 180 mm deflection path and a chassis with Fox Float damper and RockShox Lyrik fork are incentive for cyclists to go looking for the next challenge off-road.

* Integration eines zusätzlichen 375 Wh Akku durch das Twin Core System.

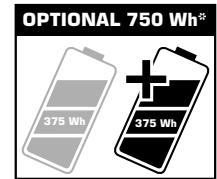

* Integration of an additional 375 Wh battery via Twin Core system.
