

the **invisible** shower

level tray

level tray

the only invisible shower tray

The **level** prefabricated shower tray is invisible since it is covered for the flooring chosen. The final result is a completely flat shower floor on the same **level** as the rest of the bathroom. The shower slopes remain hidden under the floor, where water is filtered through the joints and finally emptied through the drain. It includes a horizontal siphon drain, located in the centre of the plate and which can be rotated 360°. An innovative integrated shower system that adapts to fit any style. Versatile and efficient.

maximum comfort

For the complete absence of steps and slopes. For the freedom of movement provided by a completely flat shower, **level** with the rest of the bathroom. Perfect for those with reduced mobility. Ideal for those seeking that sense of freedom that comes from a truly integrated shower. Where daily living means the luxury of absolute comfort.

open-plan space

No obstacles. Where the shower blends in with the bathroom and the bathroom with the shower, forming a whole. A homogeneous, spacious and accessible space, with no gaps, true to its functional and elegant design.

maximum cleanliness

The **level** shower tray, besides having a self-cleaning surface treated with antibacterials and fungicides, has a system to easily lift the floor tile. This provides access to the inside of the tray and the drain siphon. No contain metal parts metal parts, which prevents rusting.

custom design

The different **level** shower sizes allow to install a diverse flooring formats, always covering at least one of the tray distances, whether width or length. Ideally, porcelain flooring should be used as the ceramic of choice. We can create a bespoke, tailor-made shower tray.
